SCRAPERS	A.R. STEEL STANDARD ON ALL DISCS
TRANSPORTATION	12SL – 16SL 14 PLY TIRES

### OPTIONS

REAR HITCH
26" X 5/16" OR 30" X 5/16" BLADES
REAR HYDRAULICS
TRANSPORTATION LIGHTS
TRANSPORT ROD STOP FOLD DOWN

Like all SWECO products, the 610 is constructed by a company that knows how to build durable farm implements. It is specifically designed as rigid semi stubble disc. The main frame is made from 8"x8"x5/8" structural tubing to prevent cracking when the disc flexes under strain. SWECO's bearing assemblies are mounted on trunnions that can pivot if the gang flexes. For a long, trouble-free life, all pivot points have large, hardened tension bushings with built-in high wear factor. The 610 also uses genuine SWECO hydraulic cylinders.
